

ANTONIO RIVERA

Grapevine, TX 76051 · (254) 247-6869 · antoniolrivera03@gmail.com · US Citizen

SKILLS

Languages: PHP, Java, TypeScript, JavaScript, Python, SQL, C#, Dart, Shell, Kotlin

Frameworks & Libraries: React, Next.js, Flask, Django, Laminas, Express, Pandas, PHPUnit

Tools and Technologies: Web Scraping, NoSQL, JDBC, Unit Testing, Frontend Test Automation, Selenium, Linux, Docker, AWS, Microservices, Government Compliance

EXPERIENCE

Paycom - Irving, Texas

November 2024 - February 2026

Full-Stack Software Developer II - PHP / C# / TypeScript / JavaScript / SQL

- **Redesigned** and implemented a workflow integrating government APIs to streamline document processing, improve code readability, and consolidate government document management into a unified system.
- **Enhanced** React-based data analysis tools to support larger datasets; built a reusable PHP framework enabling cross-team API consumption and multi-department analysis.
- **Modernized** a legacy auditing system by applying reusable design patterns and developing features that provided clients with insights into employee application usage.
- **Optimized** employee tracking dashboards by improving database queries and application performance, reducing page load times by 50% and query execution from ~8 seconds to 12 milliseconds.
- **Delivered** end-to-end development and production release of a performance-goal management feature, enabling clients to define and track goals through dynamically generated employee progress checklists; increased adoption of the goal-setting module.
- **Developed** comprehensive unit tests for full logic coverage and implemented Selenium-based frontend automation for end-to-end validation.
- **Diagnosed** and led same-day investigation and resolution of client-impacting production issues, partnering with product analysts to identify root causes, implement fixes, and deploy updates to production.

CGI - Belton, Texas

June 2023 - October 2024

Backend Software Developer - Java / Python / SQL

- **Developed** a Python automation tool to modernize legacy Java code into a standardized object-oriented architecture, processing 12,000 files (160,000+ lines of code) and completing the migration 6 months ahead of schedule.
 - **Collaborated** with system architects on time-critical payroll processing enhancements using Java and SQL triggers, delivering the solution 2 weeks after kickoff and completing the project 1 week ahead of schedule.
 - **Built** backend services in Java and Django using JDBC and SQL to support government finance tracking, enabling clients to manage and process expenditures through a secure web portal.
 - **Redesigned** employee timesheet approval workflows to modernize legacy interfaces, introducing profile image integration, table based approvals, and improved time-tracking views.
-

RELEVANT PROJECTS

LivedMatch - Trial & Research Patient Matching Platform (Research Startup) livedmatch.com

(Full-Stack) - TypeScript / Next.js / Prisma / NeonDB

- **Architected** and implemented a full-stack patient-trial matching platform using Next.js, Prisma ORM, and NeonDB, supporting authentication, role-based access control, and persistent data storage.
- **Designed** a scoring-based matching algorithm to compute patient-trial compatibility, improving selection objectivity and reducing researcher bias.
- **Integrated** transactional email services to automate outreach and applicant communication workflows.
- **Collaborated** directly with researchers in Canada to gather requirements and translate domain needs into technical design specifications.
- **Created** a deployment pipeline for managing new features and providing a test environment to verify functionality in a deployed setting.

Electricity Usage Monitor - Web Scraping & Data Visualization

(Full-Stack) - Python / Selenium / MongoDB / React

- **Built** a Python and Selenium-based data pipeline to scrape and store electricity usage data for ongoing analysis.
 - **Developed** a React frontend to visualize usage trends and make consumption patterns easy to interpret.
-

EDUCATION

Texas A&M - Central Texas: **Bachelor of Science in Computer Information Systems**

December 2023
